*Abstract:* In 2016, EPA issued regulations establishing a process for federally recognized tribes to obtain treatment in a similar manner as states (TAS) for purposes of administering the water quality restoration provisions of Clean Water Act (CWA) Section 303(d), including establishing lists of impaired waters on their reservations and developing total maximum daily loads (TMDLs). The CWA does not require tribes to administer the CWA Section 303(d) program. However, tribes seeking to be authorized must apply for and be found eligible for TAS through the procedures described in the regulations.

Section 303(d) of the CWA requires states, territories, and authorized tribes to identify and establish a priority ranking for waters that do not meet EPA-approved or promulgated water quality standards (WQS) following the implementation of technology-based controls. For waters so identified, Section 303(d) requires states, territories, and authorized tribes to establish TMDLs in accordance with their priority ranking for those pollutants the Administrator identified as suitable for TMDL calculation. A TMDL is the calculation and allocation to point and nonpoint sources of the maximum amount of a pollutant that a water body can receive and still meet applicable WQS, with a margin of safety.

*Form Numbers:* None.

*Respondents/affected entities:* Any federally recognized tribe with a reservation.

*Respondent's obligation to respond:* Voluntary.

*Estimated number of respondents:* Five.

*Frequency of response:* Once for initial TAS status, thereafter biennially for lists of impaired waters, and from time to time for TMDLs.

*Total estimated burden:* 34,757 hours (per year). Burden is defined at 5 CFR 1320.03(b)

*Total estimated cost:* \$2,003,045 (per year), which includes \$12,443 in annualized capital or operation & maintenance costs.

*Changes in Estimates:* There is a decrease of 55,147 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. These decreases are due to: (1) the estimated annual number of respondents decreasing from twelve to five; (2) new and better data that parses out labor and costs per activity; and (3) TAS application burden and cost estimates from post-final rule, *Revised Interpretation of Clean Water Act Tribal Provision* (the previous ICR used pre-final rule estimates).
